The following are references that may be useful for your research papers. MOST OF THESE PAPERS ARE NOT IN THE UPS LIBRARY! Moreover, you will probably need to go beyond these references when writing your papers.

tolerance in Cancer irroratus; elements of comparison with C. borealis (crustacea, 
decapoda). Biological Bulletin, 180, 125-134.

membrane potential and reflex activity induced by sudden cooling of isolated spinal cords: 
Differences among cold-sensitive, cold-resistant and freeze-tolerant amphibian species. 

Biology 101:135-141.

Elner, R. W. and Campbell, A. 1981. Force, function and mechanical advantage in the chelae of 
the American lobster Homarus americanus (Decapods: Crustacea). J. Zool. Soc. Lond. 193, 
269-286.

Physiology. 21, 1-7.

the purple shore crab, Hemigrapsus nudus (Dana). I. Morphology, behavior, and respiratory 

aquatic treadmill exercise in the European shore crab Carcinus maenas. Journal of 
Experimental Biology. 162, 37-54.

Harri M. and R. Henenstam. 1972. Calorigenic effect of adrenaline and noradrenaline in the 
frog, Rana temporaria. Comparative Biochemistry and Physiology. 41A:409-419.

Harri M.N.E. 1972. Effect of season and temperature acclimation on the tissue catecholamine 
level and utilization in the frog, Rana temporaria. Comparative Genetic Pharmacology. 3:101-
112.

exchange during exercise in the Savannah monitor lizard (Varanus exanthematicus). Journal 
of Experimental Biology 198:1783-1789.

Jeffrey P. and G. Treacy. 1980. Hemocyanin from the Australian freshwater crayfish Cherax 

8:827-833.

animals: air and water breathing by fish and crustaceans. American Zoologist. 34, 216 - 
228.

Morris S., P. Greenaway, and B.R. McMahon. 1996.  Air breathing by the purple shore crab, 
Hemigrapsus nudus (Dana).  III. Haemocyanin function in respiratory gas transport. 
Physiological Zoology. 69: 839-863.

Navas C.A. 1996.  Metabolic physiology, locomotor performance, and thermal niche breadth in 

the metabolism of certain marine invertebrates.  Journal of Zoology, London. 151, 277- 
298.

Newell R.C., M. Ahsanullsh, and V.I. Pye. 1972.  Aerial and aquatic respiration in the shore crab 

Potts W.T.W. 1954.  Energetics of osmotic regulation in brackish and fresh-water animals. 
Journal of Experimental Biology. 31:618-630.

temperature and hydration state on aerobic metabolism of canyon treefrogs, Hyla 

Rashbass, C. and Rushton, W. A. H. 1949.  The relation of structure to the spread of excitation 

68:1046-52.
